REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is a method of producing an acrylic-modified chlorinated polyolefin resin, which comprises graft-copolymerizing an acid-modified chlorinated polyolefin resin with a monomer mixture containing a (meth) acrylate ester monomer having one hydroxyl group and another vinyl monomer in the presence of one or more of cyclic ether compounds selected from the group specified in the present claim 1. The independent claim 4 is a product produced by the process requiring all limitations cited in the present claim 1.

2. The closest prior art of record is Masuda et al Patent 6,861,471 and JP 11-189696. While each reference discloses an acid-modified chlorinated polyolefin, none discloses a graft-polymerization by using mixture of monomers in one step in the presence of a cyclic ether compound specified in the amended claims 1 and 4 for obtaining a coating/film composition required in the present claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olga Asinovsky whose telephone number is 571-272-1066. The examiner can normally be reached on 9:00 to 5:30 pm.
